### **Reducing food poverty by increasing agricultural**

January 16th, 2019 - As mechanism 4 was the most common we analysed these projects in greater detail The dataset contains 89 projects 139 entries of crop-project combinations with reliable data on per hectare yield changes with mechanism 4 and these are shown as relative yield changes over a baseline of 1 0 according to yields before or without the interventions

## **Soil Degradation Land Scarcity and Food Security**

January 4th, 2016 - Soil health along with water supply is the most valuable resource for humans as human life depends on the soil's generosity. Soil degradation therefore poses a threat to food security as it reduces yield, forces farmers to use more inputs, and may eventually lead to soil abandonment. Unfortunately, the importance of preserving soil health appears to be overlooked by policy makers.

## **1 Biodiversity What is it where is it and why is it**

January 14th, 2019 - Biodiversity is a contraction of biological diversity. It reflects the number, variety, and variability of living organisms and how these change from one location to another and over time. Biodiversity includes diversity within species, genetic diversity between species, species diversity, and between ecosystems, ecosystem diversity.
