Dynamical systems theory Wikipedia

January 7th, 2019 - Dynamical systems theory is an area of mathematics used to describe the behavior of the complex dynamical systems usually by employing differential equations or difference equations When differential equations are employed the theory is called continuous dynamical systems From a physical point of view continuous dynamical systems is a generalization of classical mechanics a generalization

Chaos theory Wikipedia

January 9th, 2019 - Chaos theory is a branch of mathematics focusing on the behavior of dynamical systems that are highly sensitive to initial conditions Chaos is an interdisciplinary theory stating that within the apparent randomness of chaotic complex systems there are underlying patterns constant feedback loops repetition self similarity fractals self organization and reliance on programming at the
